Anticipated Changes

We anticipate that we will report the following significant changes in the results of operations from the same period of the last fiscal year:

Revenue. Sales for the three months ended March 31, 2018 were \$0.56 million, a decrease of \$2.4 million, when compared to sales for the same period of the prior year. As a percentage, sales decreased by 81% for the three months ended March 31, 2018, when compared to total net sales for the same period of the prior year.

Sales from apple-related products decreased for the three months ended March 31, 2018, as the Company sold approximately 18.70 tons of concentrated apple juice versus 1,160 tons of concentrated apple juice in the same period of 2017.

Sales from concentrated kiwifruit juice and kiwifruit puree decreased by 95% during the first quarter of 2018 as we sold 19.73 tons and 60.42 tons of kiwifruit juice and kiwifruit puree during the first quarter of 2018 and 2017, primarily as a result of the decreased amount of products sold in the first quarter of 2018 as compared to same period of 2017 as a result of a decrease in customers' demand.

Sales of concentrated pear juice decreased by 43% in the first quarter of 2018 as we sold 18.45 tons and 1,160 tons of concentrated pear juice during the first quarter of 2018 and 2017, respectively. The decrease of revenue generated from concentrated pear juice was mainly because of a decrease in the amount of products sold due to a decrease in customer demand.

Sales from our fruit juice beverages decreased by 60% for the first quarter of 2018. The decline in revenues during the first quarter of 2018 was primarily due to a decrease in the in-store demand of our

products as a result of heavy competition in the Chinese market as consumers increased their fruit juice beverage purchases through on-line home delivery of groceries instead of through the traditional in-store supermarkets in which we sell our products.

Sales from our other products were \$61,000 and \$0 in the first quarters of 2018 and 2017, respectively. The amount of sales of other products is expected to be unstable and is generally not indicative of our future sales of other products.

Gross Profit. The consolidated gross loss for the three months ended March 31, 2018, was \$0.07 million, a decrease of \$0.47 million, from net profit of \$0.54 million for the same period of 2017, primarily due to a decrease of profit margin for all our segments, except other business.

2

The gross profit margin of concentrated apple juice segment for the first quarters of 2018 and 2017 were 11% and 3%, respectively. We did not have any inventory of concentrated apple juice during the first quarters of 2018 and 2017 and we had to purchase concentrated apple juice to satisfy our customers' demand, which caused a lower margin. The increase in gross margin in the first quarter of 2018 was mainly due to an increase in sales price to our customers.

The gross profit margin of the concentrated kiwifruit juice and kiwifruit puree segment was 9% and 23% for the first quarters of 2018 and 2017, respectively, primarily due to a decrease in production during the first quarter of 2018, which resulted in a higher ratio of fixed expenses to the unit cost of our products.

The gross profit margin of the concentrated pear juice segment decreased to 6% for the first quarter of 2018, from 14% for the same period of 2017, primarily due to the higher costs of fixed cost allocation, primarily due to a decrease in production during the first quarter of 2018, which resulted in a higher ratio of fixed expenses to the unit cost of our products.

The gross profit margin of our fruit juice beverages segment decreased to 9% for the first quarter of 2018 from 20% for the same period of 2017. The decrease of gross margin of fruit juice beverages was primarily due to a decrease in production which resulted in a higher ratio of fixed expenses to the unit cost of our products.

Other Income (Expense), Net. Other expenses, net was \$452,598 for the three months ended March 31, 2018, an increase of \$594,989, as compared to other income of \$142,391 for the three months ended March 31, 2017, primarily due to an increase in interest expenses and other expenses.

Interest expense increased to \$445,594 representing an increase of \$414,798 during the three-month period ended March 31, 2018, as compared to interest expense of \$30,796 the same period of 2017. The increase was primarily due to penalty of interest charged by the banks during the first quarter of 2018 for the default loans that the Company has not repaid on time.
